LOCALLY OWNED AND OPERATED

Established in 1998, Toca Alarm Service, Inc. is located in Kenner, Louisiana and currently provides exceptional service to over 10,000 homes and businesses throughout the Metro New Orleans and Gulf Coast area. Toca installs and monitors custom security and fire alarm systems for residential, commercial and government applications.

At Toca Alarm, we believe it's the details that set us apart. That's why every system we offer, along with our service, represents the highest quality and value. We pride ourselves on offering well designed and engineered products that provide peak performance when needed most. We spare you the time and the expense of repeat service calls and frustration.

Available Colors:

Your home or business is the place where you are most comfortable and secure. It's your safe haven from the world. But even at home or at work there are dangers.

For some, there's the threat of break-ins and burglaries. For everyone, there's the chance of fire or other emergencies. Thanks to advances in technology, today's alarm systems are not only incredibly efficient and accurate, but so simple a child can use them.

FULL TIME SECURITY

Your security system is like a personal 24 hour sentry. It's always on duty, always vigilant, and always ready to sound an alarm at the first sign of danger. When your system is monitored, it will also alert your emergency responders that help is needed. Whether you're awake or asleep, at home or away, your home is protected. Many insurance companies offer savings on premiums when your system is monitored.

Toca Alarm Systems are modular, created from a variety of components, providing you with different levels of protection. Depending on your needs, your system may include:

- Interior/exterior motion detectors
- Smoke and fire sensors
- Glass break sensors
- Window and door switches

Sensors are the eyes and ears of your system. They detect motion, body heat, or breaking glass, and signal the control panel.

DESIGNED FOR YOU

Almost any system can provide basic protection from burglary and fire. A Toca Alarm system offers additional features, some standard and some optional, that make them easier to use while enhancing security. Because systems are modular, you can specify exactly the level of security you want. Once installed, your system is programmable to customize it to your lifestyle.

FEATURES YOU WILL APPRECIATE:

My Access™— Control your alarm system via SMS text commands or from our very own iPhone/Android app. Receive status messages and alarms directly to your cell phone and/or email.

Red-illuminated Keypad— When tripped, your system sounds the alarm for a defined amount of time, and then turns off. Our keypad remains illuminated red after the alarm turns off, giving you a visual warning that there was an alarm while you were gone.

Pet Immune— There are even pet-immune detectors that allow your pet to wander the house without tripping the alarms.

False Alarm Reduction— False alarms annoy neighbors and may result in fees from your emergency responders. Toca Alarm has special features that reduce false alarms, ensuring reliable emergency responses.

Easy-To-Use— You control your system from the keypad. Ours are not only attractive, but are also easy to see and easy to use, so there's minimal training required. Easy operation ensures your system will be used by employees, with fewer false alarms.

For Your Business— Know what's happening at your business with alerts via text or phone when staff arrive & leave, and reports of traffic counts and open/late to close.

No Landline? No Problem— Eliminate the expense of a phone line, or add an additional level of protection against down phone lines with Toca Alarm's cellular unit. Choose cellular, network, or dial-up communication options to ensure your system is in a constant contact with our monitoring facility.

The unique Home/Sleep/Away function lets you choose the specific level or protection you need with a single keypad press.

"Home" setting arms the perimeter of your home, but allows you to move freely anywhere inside.

"Sleep" mode arms both the exterior of the home and designated interior spaces, so you can move in and around your sleeping areas.

"Away" setting arms the entire home, both exterior and interior sensors, for the highest level of protection.

"Bypass" mode allows you to ignore a part of the protected area while the system remains armed, a patio for instance.

MONITORING FACILITIES

Our  listed central monitoring facility is located in Louisiana. In the event of an emergency or natural disaster all signals will be handled by our out of state facility. Our trained and certified central station operators are familiar with the local area and requirements of the local authorities. This will greatly improve the service to our clients which can provide faster service when dispatching fire, law enforcement, or medical emergency personnel.

HOME AUTOMATION

Wireless control for lighting and appliances, door locks, cameras and thermostats.

Now you can teach your system some great, new tricks. Add easy-to-install devices, and your security system becomes the brains of a customizable home control system.

CAMERA

- **Build Your System**– There are a variety of devices to choose from, letting you select just the things you want to control.
- **Stronger Security**– Have your system programmed to turn on and dim lights, lock and unlock doors, turn appliances on/off, view your home and/or business real time with optional camera and even control your thermostat.
- **Added Convenience**– You can individually control devices via your security system but a bigger benefit comes when you combine commands to several devices to create your “Favorite” settings. “Favorite” lets you quickly set the mood you want.
- **Mobile Control**– These devices can be controlled via text with MyAccess™ service, or an APP on your Apple iPhone® and iPad, on your Android™ Smartphone or Tablet.

FAQS

Compare Apples to Apples– Not all alarm companies and equipment are created equal.

Make an informed decision about the safety and security of your home and business. Toca Alarm is here to help.

- 1. Does Toca Alarm sell your account?** Unlike many alarm companies out there, Toca Alarm does not and will not sell your contract to another company. You have the peace of mind knowing your account will always be with Toca Alarm.
- 2. Can I get an insurance discount?** Yes, most insurance companies do offer an insurance discount of up to 20%.
- 3. Are installations different from company to company?** Yes, the installation of a security system is only as good as the knowledge of the technician installing the system and the security consultant designing the system.
- 4. Will my system come with a warranty?** Yes, Toca alarm offers one of the best warranties in the industry.
- 5. Does my system test regularly?** Yes! Most companies program to test every 30 days or not at all. Toca Alarm cellular systems test every 24 hours.
- 6. What should I expect to pay for monitoring of my system?** We offer very reasonable monthly monitoring rates. Be extremely cautious of cheap monthly monitoring rates as it usually means inadequate monitoring.
- 7. What happens if my phone line is cut?** We enable a feature called phone line monitoring. The system will sound if line is cut and system is armed but we will not receive a signal unless the system is equipped with a cell backup unit.
- 8. Can I use my system while on premises?** Yes, there is a feature which you arm system in stay mode which bypasses the motions and allows you to walk around the premises while maintaining a secure perimeter.
- 9. Is cellular more reliable?** Yes, cellular transmits much faster and you do not have to worry about your phone line being disabled or alarm signal not transmitting due to phone company having technical issues.

WATCH YOUR HOME OR BUSINESS FROM ANYWHERE!

Toca Alarm offers professional, easy to operate CCTV camera systems with remote viewing over the web and is compatible with most smart phones. Toca Alarm, along with today's technology, can design a camera system for your home or business. We offer some of the most advanced cameras, digital video recorders, nanny cams, covert and retail solutions. We have designed well over a 1000 camera systems throughout Louisiana and the gulf coast. Let us design a system that is right for you.

REMOTE VIDEO MONITORING

Toca Alarm uses the Immix platform from Sureview Systems, which is the industry's highest UL-rated platform for video monitoring. This platform allows us to customize non-proprietary, real-time proactive and interactive monitoring solutions using an open architecture for seamless integration with any video surveillance system on the market.

KEY FEATURES:

- Real-time, event generated alarm notification
- Proactive and interactive monitoring with full PTZ control
- Send instant alerts and video clips to any device
- Open architecture system with easy-to-use interface

LOSS PREVENTION

To improve loss prevention and reduce customer injury claims, we formulate cost effective security solutions with virtual guard patrols, video analytics and video verification features. For loss prevention professionals, our diversified line of innovative services capitalizes savings, minimizes losses and increases protection levels.

AUDIO / VIDEO

HOME THEATER: Toca can custom design a system to fit your needs. It could be as simple as installing a tv on the wall, to the most advanced levels of multi-room audio and video, including lighting control.

NuVo brings the advanced technology of superior home sound together with the simplicity of user-friendly design, all at a price that is easy to live with. That's why we like to say NuVo is The Sound of LiVing.
